MR. KUSHI: It could be interpreted to conform to what Ms. Raisbeck is saying, as long as she's listed the agenda items on the testimony --

MS. RAISBECK: I did.

MR. KUSHI: So I would suggest she has three minutes on each item.

MS. RAISBECK: Thank you, Mr. Kushi.

9 MR. KUSHI: I would also suggest you carefully 10 time them.

11 MS. RAISBECK: Pardon?

CHAIR STONE: Let's stick to that.

MS. RAISBECK: Okay. I apologize for taking advantage of errors in your rules, but I need to do it.

On the Executive Session, obviously, if you're going to talk about who you are going to hire, you need to go into Executive Session. Who you hire will be determinative of how effective your work is going to be. So I hope you will announce in public, which you should. how many applications there have been for each position. If you really have very few, if you don't have good applicants, open the process and start over. Because who you hire as your analyst is going to determine how

much you can do good work. Okay. That's all I need to say. Thank you

The functional problem is that, on Friday, the Council is taking up a amendment related to property tax. And our Charter specifically says that anything having to do with revenues has to be taken up in the annual budget. Now, our annual budget has already been

Now, if you want a rate change, okay, this would mean that you can change your rate anytime during the year. And that's what's happening with our Charter amendment that specifically says, "Unless otherwise specifically provided for in this Charter, all fees, assessments, rates and taxes imposed by the County shall be set in the annual budget." How does this happen?

The annual budget was approved in -- in May or June. It's been signed. And now they're taking up -well, obviously, Corporation Counsel said it was legal. Well, what language is he speaking? An ordinary -- what construction is he getting to our Charter? Is he making our Charter irrelevant and -- and depending upon his skill and articulation that, as a scholar, does that leave me, a guy who reads English on a medium level, guessing as to where the power goes? It does.

So I think these are the problems that you need to address, not district voting. Okay. This is the -- this is the tearing apart of our system right

very much.

2 CHAIR STONE: Thank you very much. Lisa, our 3 next testifier, please.

MS. KAHUHU: Jim Smith.

CHAIR STONE: Hello, Mr. Smith. Thank you for coming.

MR. SMITH: Chairperson Stone, Members of the Commission, thank you very much for serving. I'm deeply grateful, deeply grateful for your service.

There's two items I've listed I wish to address. They are -- that would be Section II-A, the letter to Councilman Mateo that's already been sent, as well as IV-A, which is a presentation by the Department of Water Supply.

First, let me just ask if, in your minutes, under the provision that says "Proposed Charter Amendments by Commissioners," that you identify the Commissioner and the section of the Charter that the amendment relates to. It would help, I think, interest.

The other thing is that, right now, all you have to do is look around and see whether or not the structure needs to be addressed. I don't think it does. I don't think we need district voting. I think at the -- at the best, it's even, and -- and, at the worst, it will destroy. So it shouldn't even be considered.

here. It's entrepreneurial zeal, this balancing by a Director of Planning when we have rules that apply for equal treatment. So what's the balance? Easy. Is it good or bad or nothing? If it's nothing, don't do it. If it's bad, don't do it. If it's good, it's necessary, then do it. That would be my advice on that.

The Department of Water Supply I have been involved with for 20 years in a private way, in a legal system way --

MS. KAHUHU: Time.

MR. SMITH: -- and a personal way. It will be a minute. And basically --

CHAIR STONE: Mr. Smith, you're welcome to come back after the --

MR. SMITH: It will be a minute. I'm sorry. My point -- my point on this -- you say I have one more

CHAIR STONE: Sorry.

MR. SMITH: I don't want to take any more of your time.

CHAIR STONE: We've decided to really stick closely to the rules. And -- and we are happy to have you back just after the other testifiers.

MR. SMITH: Fine. I'll come back -- I'll come back after the other testifiers.

And I see, in one part, it talks about maybe Lanai and Molokai not being part of the same same district, if you go district voting. Everybody seems, in Maui, to want to go district voting. And that's fine. But if, for some reason, these neighborhood boards or island boards didn't work out and then you had Molokai as one part of a bigger district and Lanai in another district as a small percentage and Hana and another district as a small percentage, their weight would be compromised even greater. MR. TAYLOR: Thank you, Mr. Chair and Members of the Commission.

I wasn't exactly sure what you wanted to hear, so let me just give some general facts. And towards the end, I'll throw in some sort of opinion.

There have been five Charter changes regarding the autonomous, semiautonomous or -- or under the County management role of the Board of Water Supply since 1955. 1955, 1960, 1977, 1983, and then 2002, all of those years, we kind of went back and forth between some level of semiautonomy and being a County department. So it has changed five times since 1955.

The Board of Water Supply is in receipt of your letter asking for input. They discussed this item at their meeting last Thursday. They intend to discuss it and write you a letter about how, as a board, they feel by roughly September. Just like your group, they only meet once a month, so they need some time to do that. But they've already discussed it and they intend to get you something about whatever that board feels by September.

The County Council is discussing it at Water

sets their rules, their board approves the budget, and 1 2

- their -- they actually have their own attorneys. I
- 3 think they have two of their own attorneys. So that's a
- 4 very strong board. The only thing I think they're
- 5 linked to the County with is human resource support and
- 6 maybe some other, you know, miscellaneous things. They
- 7 float their own bonds, et cetera. So they are very
- 8 strong semiautonomous, almost to the point of being 9

autonomous.

sort of weak.

I think all the incarnations of the Maui County Board of Water Supply in the past, even when it was semiautonomous, is what I will call weak semiautonomous. The Board set the rules, but the Council controlled the rates and Corporation Counsel was still the attorneys. So you had this sort of weak semiautonomous that was only a little bit further than where we are now. And Mr. Kushi can -- can verify, but I think even the Mayor and possibly the Council even had some -- some authority to -- to approve the rules of the Board. So you had this semiautonomous board that was

So it's important to note in your future discussions that simply saying "semiautonomous" does not define the management structure. You have to be more clear about rules, rates, budgets, attorneys, ability to

Page 26

Resources Committee tomorrow morning at 9:00. It's the second thing on the agenda item.

So there is discussion about these items.

Some other things that are factual that I think are sometimes discussed incorrectly is what it means to be autonomous, what it means to be semiautonomous. Right now, we're under the County, like any other County department. The Mayor is my boss, the Council is our legislative authority.

Complete autonomy means that neither the Mayor nor the Council have anything to do with your operations. It means your board has complete authority and it also means that, even though autonomy means you're a government agency, you have your own human resources, you have independent negotiations with the union and with -- with acquiring land and things like that.

Even the City and County of Honolulu Board of Water Supply is not autonomous because they still get human resources support and still fall under the union contracts of the City and County of Honolulu. So they're also semiautonomous.

Semiautonomous is a whole range. You can be very strong semiautonomous, like the Honolulu Board of Water Supply. Their board sets their rates, their board

float bonds, you know, land acquisition, et cetera. So I think that's the number one thing that I told the Board last week, and I'll tell Council tomorrow, keep

4 that in mind, that there's a wide range of things called 5 semiautonomous, or even autonomous. 6

And in our past, the board members were all appointed by the Mayor, approved by the Council. Now, other municipalities, they sometimes even have elected board members. So that's another possibility. There's a lot of different ways to do this.

So those are the facts about the history and what some of these possibilities are.

I'm going to move a little into some -- try to frame this discussion for you.

I was just at the National American Waterworks Association Conference two weeks ago. And that's the -it's the association of all the water utilities in the country. Knowing this was coming up, I attended a three-hour panel discussion on to have a board, to not have a board, to have it under the County, to not, you know, with maybe 150 of the largest utility managers in the country. So I was able to ask them a lot of questions, get a lot of information.

And I explained a lot of this to the Board on Thursday. And I'll say some of the same things to you

1 in brevity.

First of all, a board, if you have one, is supposed to be representation of the owners, not an extension of management. That is the first thing to remember. The board's not supposed to represent the customers, they're not supposed to be the managers, they're the owners. The public owns the water system, the public owns the pipes, the public owns the pumps, the public owns the treatment plants and the tanks, the public owns the trucks. The public owns the system. The board is supposed to represent the owners. The department manager is senior manager. The board is not supposed to be management. They're supposed to be owner's representation.

Okay. That's the first thing to remember.

So second is to think about what problems we have and look for the right structure to solve those problems.

Now, I'll get really strong into my opinion here. I think the problems we have for the next decade are these questions of equity. Are we going to expand our service area? Are we going to get more sources? Are we going to get water to the people Upcountry? If so, who is going to pay for this? Are we going to raise meter fees and have the new users pay? Are we going to

and be the full representatives, either one or the other, and not try to go halfway. Because then we end up with something that's ineffective.

And, again, the board is representation of ownership, not an extension of management. So I think, if everyone focuses on those issues, at least we can decide that we agree on that, and how best we do that is a question, you know, for the Board of Water Supply and for you folks.

So I hope that kind of helps explain some of the language and what we've done, what some other people are doing, and helps frame your discussions.

13 CHAIR STONE: Thank you for that. 14 Commissioners? Commissioner DeLeon.

MEMBER DELEON: Thank you for coming, Dave.

Owners are the ratepayers, then?

MR. TAYLOR: The owners are the ratepayers, yes.

MEMBER DELEON: Okay.

CHAIR STONE: Commissioners, any further questions? Commissioner Moikeha.

MEMBER MOIKEHA: Dave, you said you met with numerous management of these utilities, water, whatever. In their experience, did one prove to be better than the other, government versus the board?

Page 30

Page 32

raise everyone's rates and have everyone pay? These are the questions that are not water utility management, they're not engineering; they're pure questions of equity and fairness of the owners. So who is going to balance cost versus output? That's, in my opinion, the real challenge we have, say, for the next decade.

Now, is that better to have a board, is that better to have a council? I'll leave that to you folks.

What I would say, again, from opinion, is rules, rates and budgets are one thing. They're not two different things. So to have a system where one group sets the rules and the other group sets the rates, I don't think that's very functional.

Right now, you have Council setting the rules, setting the rates, approving the budgets. If you had a strong board set the rules, set the rates, set the budgets, that would also be clear. My opinion is anything in between is structurally ineffective.

So what I told the Board, and what I'll tell Council tomorrow, and what I'll tell you, is whatever you think the best way to look towards the future is, you know, I won't opine on that, but I would say that you should really focus on one group or the other, either a council or a board, setting rules, setting rates, setting the budgets, floating bonds, et cetera,

MR. TAYLOR: I think the biggest thing I learned is that you have to set up a system that works for your problems. And you had a lot of people advocating for what they did. But that may not work for us. I think most of the bigger groups seem to have a strong board. That doesn't mean it works in -- everywhere. It doesn't mean it's the right thing. But everyone was pretty clear that you have to decide what are the issues facing us and what's the best way to handle them. But most of the large utilities do seem to have strong boards.

MEMBER MOIKEHA: Okay. Thank you.
CHAIR STONE: Commissioner DeRego.
MEMBER DEREGO: Yeah. I was going to ask the same question, but in a little different way. Were there other variables besides size that dictated whether one system worked better than another, or is size the primary variable?

MR. TAYLOR: It's not primary -- it didn't seem to be primarily sized. And there didn't really seem to be any two that were identical. For example, a lot of them had different authorities vested in these different groups. And, again, some had appointees, some had elected people on the Board. There -- it just seems like if you can take all these variables, choose some,

you'll find a utility that -- that operates that way, and you'll find one that works well and one that doesn't work very well. And everyone also agreed it has to do with, you know, who's on the Board and their knowledge of what their role is, and, you know, what problems as a community you're facing. But it -- no structure itself is going to resolve all the issues.

You know, as I mentioned earlier, the big issue in water utilities is, are you going to pay a lot and have a lot of services, pay a little and have a little services. At some point -- and in our community, it stretches even further; who is going to subsidize who. All right. Right now, we have -- for example, residential rates are subsidizing agriculture, down country subsidizes Upcountry. Should this continue? Should it get more subsidies? Should we have lack of subsidy? Should existing users subsidize newer users, or not? It's these questions of equity that it really matters.

Is either your government agency or your council, let's say, or your board going to be willing to face those issues and make some decisions about them. And whether that's your elected officials or an appointed board or an elected board, whatever way you think is best, I think it's best to clarify that those

not, you know, one or the other.

Again, I do have some personal opinions, which I'm not going to share. I told the Board the same thing. I don't think it's really appropriate for me to say what I think is best. I think it's best for me to show what the options are, talk about what we can all agree with, in that these definitions are the different ways to run things, and we can all agree the problems we're facing and we can all sort of structure our decision, saying we can all agree that whatever's best to solve these problems is what's best. And then the Board will make their own determination about what they think is best, and they'll let you know that. And you folks will, you know, obviously, listen to the public.

But they can all work. The question is, which one is best and which one is best to handle our future.

CHAIR STONE: Commissioner Wiger, you had a question? I'm sorry. Commissioners, please speak into the microphone just for our records. Thank you.

MEMBER WIGER: Yes. Wondering, given that you were at this conference and, obviously, had a chance to meet with people coming from a variety of places, was there any place that you felt was anywhere close to some of the geographical challenges that we face here as opposed to -- I think a lot of other places probably are

Page 34

Page 36

are really the issues facing us. And whoever is going to take them on, whoever is best to take them on, that's the best way to do it. And what's best in our community, I think, is why you folks have been put on this Commission.

MEMBER HASHIMOTO: Chair?

CHAIR STONE: Cliff.

MEMBER HASHIMOTO: Yes, sir. I had a conversation with a friend, also involved in some of this County work as well, but he made a point, he said — I said, "Would you be willing to serve as an elected official of some kind, you know, for the next coming years?" He said, "No." I said, "Why not?" And he said, "Well, I'd rather be appointed." He said, "That way, I don't owe it anybody. That way, I can make decisions purely on how I feel rather than to the people who elected me or paid to have me elected." Because that's the way it works today. So what are your thoughts?

MR. TAYLOR: Again, there's some different ways to do it. And both sides chime in very strongly. Some feel that an independent board is the best way to represent the people, and other people feel that authority and accountability right back to the elected officials is best. And whether you like the results or

1 a little more tidy in their physical orientation.

2 MR. TAYLOR: I don't think, for this 3 discussion, that's the biggest issue.

MEMBER WIGER: No, no, no. I was just wondering if that was --

6 MR. TAYLOR: There are certain other areas 7 that have wide-ranging geographical operations. But 8 from a board standpoint, what there certainly are is 9 places in the Southwest who -- they're out of water.

Everyone's accounted for all the water. They're trying to grow their communities, but they have -- for example,

they have Native American tribes who have water rights
 and -- and there's downstream water users. And so

14 they're trying to grow, but the local municipal

governments are tapped out of water source, just like
 us. The economy is down, nobody has any money. So from

that sense of decision-making, I found, whether they
were big or small, an awful lot of other utility

managers that were in exactly the same seat. And I
 think that is a more important --

MEMBER WIGER: Yeah.

MR. TAYLOR: -- kinship than their size or -- or their operation.

MEMBER WIGER: That's very helpful, I mean, that kind of framework. Because that does put it, then,

CHAIR STONE: Commissioner Crivello.

MEMBER CRIVELLO: Thank you for affording us this opportunity. I have a question. You know, it says that the Department of Water Supply shall implement the County's General Plan and Community Plan, et cetera, and then whatever the long-range plan is, they take to the Council for approval. Does that come from the Board, basically? Is there a total discussion with -- with the Board of Water Supply, or does that come from the management, the director and --

MR. TAYLOR: The job of the director, whether it's -- whether there's a council or the board, is really the same. And that's to come up with a plan to meet our needs and present it to either the board or to the Council or, in this case, sort of both, and get approval. So as far as implementation of the Maui County General Plan or any of the other plans, it's still our responsibility as a department to kind of put something together and say, here's what we want to do, here's how we want to pay for it, here's how we want to change our rules. Whether or not we go to the Council with that or go to a strong board isn't really fundamentally different to -- to somebody like me. It's

rule, rate, bond float, budget approval, or leave it the way it is where the Council has all that approval. But not try to split those and call them different -- you know, to different bodies. One body needs to control all those things.

MEMBER BAXA: Thank you.

CHAIR STONE: Please, Commissioner DeRego.

MEMBER DEREGO: Thank you. Dave, so what you're saying is -- and I don't know that much about the Honolulu Department of Water Supply -- is that the County in no way subsidizes any of the operations of the Department of Water Supply in Honolulu, or it's all the ratepayers' kuleana, if you want to put it that way, to maintain the system, the infrastructure. And even now, they're branching out into wastewater, from what I hear, in some areas. Is that what I'm understanding you're saying?

MR. TAYLOR: That is correct. And it's also correct here in Maui County. Your water rates and water fees only go for Water Department operations. Your sewer rates and sewer fees only go for sewer operations. Both water and sewer in Maui County are utilities where they operate 100 percent off their own revenue and they're not subsidized by property taxes. And, in fact, both water and sewer pay money into the General Fund to

Page 38

still a group of people, we go, we explain everything, they end up voting, we get our direction.

So I think what's most important is to not have piecemeal authority, where you have to go to both the board and the Council, and they both have to agree.

In the old days -- which was, you know, nine years ago -- the Council -- I'm sorry -- the board had to approve the budget. But then the Water Department still had to go to Council and get the rates approved. But if the Council didn't approve the rates that would fund for that budget, you had to go back to the Water Board and say, "Well, it didn't work out." So you're kind of going back and forth between two boards.

MEMBER CRIVELLO: Thank you.

MR. TAYLOR: That's, I think, really the issue, to answer your question.

MEMBER CRIVELLO: That's what I needed, the clarification.

CHAIR STONE: Commissioner Baxa.

MEMBER BAXA: So, sir, what you are saying is -- if I got it correctly, is that the authority of the rules, budget and rates should be confined to just one entity?

MR. TAYLOR: That is absolutely my opinion. That's correct, one entity. Either a strong board with

Page 40

1 support payroll, Corporation Counsel, management 2 information computer services, you know, personnel, et

3 cetera. So both of us -- both water and sewer of Maui 4

County are independently -- are financially independent and we pay for the general services we -- we use.

CHAIR STONE: Commissioner Okamoto, you had a question?

MEMBER OKAMOTO: Yes, because I'm not as familiar with the Water Board, since Lanai is not under you. Would you -- when you're talking about a strong board, you're meaning strong, that they have all the powers to do these things. Would you consider the current one not -- I hate to say weak, but the Council is the one that has those powers, is that what you're saying?

MR. TAYLOR: Yeah. Under -- under my terminology, the current -- the current board, I wouldn't even -- I wouldn't even call weak. I would call them advisory. They -- their only authority is appealing specific determinations by the director. So the terms I was using, "strong" and "weak," are meant to go with the word "semiautonomous."

MEMBER OKAMOTO: Right.

MR. TAYLOR: So either strong semiautonomous or weak semiautonomous. When you're under the County,

MEMBER OKAMOTO: Now, all these changes that have happened, the five different changes, have you gone back and researched? Did things work any better under any one of them that you could see?

MR. TAYLOR: I've only been with the department for six months. I was in the Wastewater Division of the County for about 19 years before that. So I watched it from the outside. And I just look back at watching how the Council and the board sort of struggled with who was responsible.

And I think you're lucky discussing this issue as a -- as a commission, because you have Mr. DeLeon, Commissioner DeLeon, who probably knows more about the historical happenings of the Department of Water Supply than about anybody who lives on this island over the past 20 or however long years. So I think -- when you have those discussions, I think he can probably tell a lot of stories about what was good and what was bad, far more than I can.

Sorry to put you on the spot there, Dave. MEMBER OKAMOTO: Thank you.

very happy. I think if you want to be a water user and you're not, you have a lot you want to subdivide and you've been on a list for decades, you're probably thinking it's not so good. So I think that's really this question of equity, is, is that a problem. You know, if you feel that the people who aren't getting service, who should get service, that that is somehow the County or the department's letting them down, then something is broken. If you feel that the goal of the department is to serve its existing customers, then I would say it's not broken. But, again, that's really something only -- only the public as a whole, I think, can answer.

I think the management of the operations -this is before I got there -- I think it's pretty good. I think the guys run the plants well, they maintain it well, they fix things quickly, you know, that your bills go out on time, et cetera, et cetera, et cetera. I think, from an operational standpoint, I don't see any problems.

The question is, is equity of growth. And I think that's really what we're facing as this challenge, this problem. And whatever best way to hit that is what we need to do. But, again, that's really a question, really, for the public and not for me.

Page 42

CHAIR STONE: Commissioner DeLeon. MEMBER DELEON: I'll take that under advisement.

Dave, I'm going to put you on the spot. Is it broken? Is the present system we have now functional? Does it need to be fixed?

MR. TAYLOR: I could answer that both ways. And if you -- if you look out there and feel like everything's fine, then it's not broken. If you think that there's problems out there in the real world --

MEMBER DELEON: No. I mean the structure -the structure of the Water Department as functioning under the political system now, as to all the -- all the marbles are on one side, they're all on the Council, and -- and so you have one set of decision-makers, you're not -- you don't have two. You're not a division you're talking about. And I don't hear anything coming from the public. I was wanting to hear from you whether you thought there was something we need to fix?

MR. TAYLOR: I think that's something that only each member of the public can decide for themselves. I think if you're an existing water user, you get your bill on time, the water is clean, safe to drink, you always have pressure, if there's a break, it gets repaired quickly. I think existing water users are Page 44

MEMBER MOIKEHA: You know, I'm sitting here thinking about this, and then I reread your functions of the department. And to me -- and I can see why you have called out some really strong points, expand service or additional resources, is really what the challenge is. And whether the Council does all of the rules, rates and budgets or whether the board does it really doesn't

CHAIR STONE: Commissioner Moikeha.

9 matter, because the key to all of this is the General 10 Plan which is under review by the Council now. And 11 because we're introducing urban growth boundaries within 12 the Maui Island Plan, that's going to dictate whether or 13 not you're going to have expansion of services where 14 growth is going to go and it's also going to tell us 15 what additional resources we need.

> MR. TAYLOR: Except I would -- I would respectfully disagree where it doesn't solve the real issue. The Maui Island Plan can make lists of all the things it wants that we should have, but only in the annual budget are resources dedicated to actual implementing actions.

MEMBER MOIKEHA: And I totally agree with that; however, this plan has been through three bodies of review and nobody has talked about the budget, which the ordinance calls out. And if they did do that, then

Page 45 Page 47 1 your plans would all line up, your resource plan, your 1 operating under, for both water and wastewater -- Maui 2 money plan, where this is going to be paid for, but 2 Electric does the same thing -- is new users, new 3 3 nobody has even done that yet. And if that happens, development, whether it's one house or 1,000 houses, are 4 then when you go to do your resource or your use plan, 4 supposed to pay the infrastructure costs and then 5 dedicate it to the utility. So that's -- water, sewer 5 you're going to know exactly what's before you and what 6 the people want and what has been adopted by ordinance. 6 and power are all, basically, done the same way through 7 7 So it kind of really doesn't matter whether it's the some different tools. 8 8 Council or the board, it's maybe who you trust more to MEMBER MOIKEHA: So where do you get your 9 9 get the work done. moneys to develop new sources? 10 MR. TAYLOR: The new source money is supposed 10 MR. TAYLOR: If that -- if that ever exists, 11 where, for example, there's a 20-year -- you know, we're 11 to come from meter fees. For example, a 12 12 five-eighths-inch meter costs about \$6,000. going to raise rates at five percent a year and charge 13 13 MEMBER MOIKEHA: Okay. this much, you know, for meters, and here's who we're 14 going to serve first, and, once we're finished with 14 MR. TAYLOR: So that \$6,000 from everybody is 15 15 that, we're going to go to this area, if that existed, supposed to pool together to -- to pay for that. 16 the Maui Island Plan --That's --16 MEMBER MOIKEHA: And isn't it --17 MEMBER MOIKEHA: How has that worked? Have we 17 MR. TAYLOR: -- I would agree with you. 18 18 developed new sources at the rate that we need to? 19 MEMBER MOIKEHA: Yeah. And isn't it 19 MR. TAYLOR: Well, some people would -- would 20 interesting, we just finished the budget, they're in the 20 say "yes" and other people would say "no," depending on 21 middle of completing this plan by the end of the year, 21 whether they want a lot of source or -- or not. 22 and they have no idea what it's going to cost, yet they 22 MEMBER MOIKEHA: Whether or not they want 23 think that's going to be force of law? For who? And 23 development? 24 this is why -- I can see why we have all these issues of 24 MR. TAYLOR: Exactly 25 trying to get things done or accomplished, because they 25 MEMBER MOIKEHA: Thank you. Page 48 1 don't have any idea what it's going to cost. Yet, they 1 MR. TAYLOR: But I think every infrastructure 2 call out these plans, they make it the force of law, and 2 manager in the County would agree with you that our 3 we don't implement them. And, yet, this Charter says 3 lives would be certainly a lot easier if there was some the Department of Water Supply shall implement the longer term plan of what's expected of us and what our 5 5 County's General Plan and community plans in the revenue stream to pay for that would be and have that be 6 administration of its affairs. Well, how can they do 6 balanced. I think we all go in every year, you know, 7 7 that? with sort of these visions of long-term strategy and, 8 So the problem really needs to go back a step yet, every year, you know, we -- we -- we ask just for 9 9 to the plans and get those where they need to be and in enough money to get through the next year, not knowing 10 10 the perspective of a budget, so we know what it's going what the year after that is. 11 to cost and how much growth we really are going to have 11 So I think what you said is certainly well 12 or allow in the way of expansion of service or 12 received. And I think all the County infrastructure 13 additional resources. 13 managers would agree that it's difficult to do 14 14 Does the current use of water now for the long-range planning with year-by-year budget. 15 individual family -- or whoever they are out there --15 MEMBER MOIKEHA: They never look at it. 16 that does not cover any kind of resource development, 16 CHAIR STONE: Commissioner Baxa. 17 17 MEMBER BAXA: I am not too familiar. 18 MR. TAYLOR: That's correct, it does not. 18 Actually, I should not even use the word "too" because I 19 MEMBER MOIKEHA: Okay. So that comes from 19 am not familiar at all with the operations of the board. 20 20 But if I get it from you, you're saying that the board the --21 21 MR. TAYLOR: Your -represents ownership; it's not -- it does not represent 22 22 MEMBER MOIKEHA: -- developers. management.

MR. TAYLOR: Your water bill is for

And the current sort of policy the County's been

operations, maintenance, replacement, things like that.

23

24

25

23

24

25

MR. TAYLOR: Right now, the board is advisory,

so I'm not really sure who it represents. But the --

they're technically still supposed to be representing

Page 49

Page 51

ownership. And the Council, being really our -- our
 rule-making and ratemaking authority, is really
 representing ownership, not management.
 MEMBER BAXA: Oh, I see. Ownership.
 MR. TAYLOR: And it's the Mayor, Managin

MR. TAYLOR: And it's the Mayor, Managing Director and myself that represent management.

MEMBER BAXA: So if you are going to take that the board really represents ownership, it would be the entity that would be responsible for making equity decision things?

MR. TAYLOR: If it was a strong semiautonomous board. I mean, that -- again, that's -- that's what City and County of Honolulu has, a strong semiautonomous board who represent the owners, sets equity rates, fees, budgets, et cetera. Right now, we have a strong Council who does all those same things.

MEMBER BAXA: I see. And the director would simply be responsible for operational matters?

MR. TAYLOR: Well, my job, the director's job, is to give them enough information, saying your choice is A, B, or C, here's the implications, explain it, and then, once they make a decision, have it implemented. So the director doesn't just wait for them to decide something. You know, as the technical experts, it is certainly our job to explain the choices to the owners,

So that if these three things, rules, budget and rates, are confined to an entity, then they would be able to move along? Thank you.

4 CHAIR STONE: Commissioner DeRego.
 5 MEMBER DEREGO: Yeah. I'm trying to say this
 6 without putting you on the spot.

MR. TAYLOR: Everyone else did. (Laughter.)

MR. TAYLOR: And I'm pretty good about going around it.

MEMBER DEREGO: I know. Yeah. (Laughter.)

MEMBER DEREGO: I want to follow -- and I don't want to put words in Commissioner's -- Commissioner Moikeha's mouth, but I think what I heard her saying is that, ultimately, there's no stability and direction in leadership to achieve this long-range planning that is necessary for developing infrastructure, for establishing rates, for looking at the health and the long-term viability of the water systems here in Maui County. Now, you went to all these meetings and you said, okay, there's these different entities, and certain variables work with certain types of municipalities. It would -- it just keeps rolling

Page 50

) |

Page 52

in which case, the board or the Council, force them -try to get them to make an answer and then implement it.
So either way, the Council or the board -- the Council
or the strong board has a similar rule.

MEMBER BAXA: But as far as you are concerned, it does not really matter where the power should be, in the elected officials or in the board itself, so long as the rules, budget and rates would be confined to an entity?

MR. TAYLOR: I'm saying I think we should all agree that it's true that those should be combined with one entity with that role. I personally have some strong feelings about which is better, which, again, I'm just not going to share, but I think -- I think that whatever you folks think is better, you should make a conscious decision about that and go in one direction or the other. And I think a lot of people have a lot of very strong opinions on this. I just don't think my decision about what's the best way to do equity really has anything to do with my abilities of running an infrastructure department. That's really just my -- my opinion as -- as a citizen. And I don't want to mix that with -- with sort of my role to -- to run the utility.

MEMBER BAXA: I see. I can see your point.

our water law, right, public trust, those kinds of things, considering our climate, our, you know, topography, our geography, and all those other things, how do you get that long-range stability and direction when the politics of it always seem to intervene in some way, shape or form?

through my head that there's got to be -- considering

And this is the thing that's running through my head. There's -- there's an -- there's an inherent sort of instability in short-term decision-making in political institutions. I mean, you know, there's a certain amount of expediency involved in that oftentimes. And I guess my question is, did you see any kind of clump of directions that would say, well, under these certain circumstances, these might work better as versus these set of variables?

MR. TAYLOR: I think what everyone's struggling with, and everyone's struggling with the same questions we are, and it's about accountability of the people versus long-term stability. And, of course, you can have long-term stability. Appoint a water director for life and you'll have long-term stability, but you won't have accountability to the people or -- or our system of government. Or you can, you know, have the elected officials that are voted on every three weeks and you'll have, you know, absolute accountability to

people and no stability. So where is that middle ground? You know, I don't -- I think everyone has their own opinion on that. And where the best balance is, I think every community is making a little different decisions.

I mean, I think the guy I met who -- who seemed happiest with his group is somebody I was partnered with in some of the working sessions. I think it was Pueblo, Colorado, is where he was from. They have an elected board who serves six-year staggered terms. And he was pretty happy with -- with his. And he was -- he was in my position. I think Pueblo, Colorado, I think that's where it was. And he was pretty happy with that. He felt they had a balance of long-term direction and accountability back to the people. So --

But then, you know, I did ask him some questions. And I asked several people this question. What happens if the county as a whole is redoing sewer, roads, sidewalks and drainage over here, and this semiautonomous water board says, we're not doing that, we're doing this other thing. You know, how do you -- who is -- no one's really in charge. So I never really got a good answer to -- to that.

I mean, the opposite side to the argument you

MEMBER SUGIMURA: So when was the last time that the Charter was changed in your department? When was the change?

MR. TAYLOR: I believe it was 2002. It was --MEMBER SUGIMURA: It was just --

MR. TAYLOR: It was the same election that Mayor Arakawa was first elected. I know it was that election. I believe that was the 2002 election that the Charter changed.

MEMBER SUGIMURA: So it was just done and so you're sitting with the changes that were done at that time, correct, that you're running with?

MR. TAYLOR: That's correct.

MEMBER SUGIMURA: And so I'm just -- I'm just wondering if -- if we're the public or we're representing or trying to make changes to the public and we keep on trying to change your department, how effective is that? I'm sure you're going to send us some of your good ideas so that we can consider it, because we certainly wouldn't want to just keep on changing your departments every 10 years without having you or the department being able to work through and make it work with whatever -- whatever the wishes were in 2002, does it need time, then, to still implement or -- or is it time to look at it again?

Page 54

were making is, right now, Council does zoning. And so if Council zones an area, you know, you can say they also have some authority to get those people water, whereas if an independent board or semi-independent board said, we don't care that you zoned that, we think that was a dumb place to zone, we're not putting a water line over there. You know, you have that possibility.

So there are -- there is no great way to do this that settles all these problems. I mean, there -- there is nothing. I think you'll find that almost every infrastructure manager in the country at every level wishes there was some five or 10-year guaranteed strategic plan of funding and actions they could follow. And every one of us at every level goes year to year trying to keep their plan going, whether it's federal, state or local.

And I don't know of any real absolute answers to any of these questions. So that's why I think it's -- it's a good thing to talk about, because it's not something you can calculate or define or know for sure you did the right thing. It's really a subjective judgment, which I think is why the board is going to weigh in and -- and you folks are going to weigh in and do something or not.

CHAIR STONE: Commissioner.

Page 56

MR. TAYLOR: I think that largely is a question up to you folks. I can tell you that I'm not going to be sending you anything. The Mayor may or may not send you his suggestions, and they may involve the Department of Water Supply. I'm an appointee of the Mayor. I'm not -- you know, I share my opinions with him and his staff. And whether or not, you know, he chooses to endorse that and send them to you, that will be up to him. So I am not going to be taking any position on this. I'm just really trying to educate the board, the Council, the Mayor and you folks about your options and -- and really the different variables that weigh against each other.

As far as how long they've had to kick in, every transition is, obviously, difficult. There's always going to be a couple years of transition.

Again, I'll go back to -- to looking at the past eight years. And let's just use the Upcountry meter list as an example. The only way to solve that problem, as I've said a number of times, is somebody is going to have to pay a lot of money, either the people who are on the list, the people Upcountry, or everybody. Somebody's going to have to say, look, we're going to pay and we're going to do this. Now, if you think that's so expensive that it shouldn't be done, well,

14 (Pages 53 to 56)

then nothing's wrong. But if you think, no, that should absolutely be done, and, you know, somehow the whole system's let us down because it hasn't been done, well, then there's something wrong.

So it's really not for me to say whether

that's wrong. I mean, the budgets have been approved by the County Council and by the Mayor that say this is what we're going to do, this is how much rates are going to be, and that stuff has gotten done. Whether you think that's been the right balance or the wrong balance -- I mean, you have to decide that. And then if you think that's the wrong balance, well, then, obviously, you think there's a problem. But if you think it's been the right balance, well, there's no problem. But only -- only, you know, you can really decide if you think it's been okay or not.

I'm ready to teach eighth grade civics, you know, with my power for the people.

CHAIR STONE: Commissioner Sugimura, you have something else to say?

MEMBER SUGIMURA: Let me just finish this, then. So thank you for your response. And maybe you should run for office. It's like listening to a -- you're trying to answer us, but not answer us. But I understand that.

amount of engineering work. And they're -- they're nearing completion on that. We also have our finance group looking at how we might fund this, how it would affect rates or meter fees. That's all being packaged together. And probably, in a couple months, we're going to go to Council, we're going to show this to them and say, look, here are some options, option A, we just take care of the easy people, Option B, we take care of everybody and float, you know, some -- some enormous amount of bonds, what do you want us to do.

So we have to do that -- we have to do our engineering work regardless of whether or not it's a board or the Council. So the question is, when we take this package of Option A, B and C -- you know, inexpensive, it doesn't serve a whole lot of people, super expensive and takes care of everybody, or somewhere in between -- when we take this, we either take it to a board or we take it to the Council and say, which do you want us to implement.

So that's the kind of question that maybe the two would decide exactly the same thing, in which case it doesn't matter. You know, maybe one or the other makes good long-term decisions. But our role doesn't really change. We have to put together these scenarios and costs and implementing actions. And we need to get

Page 58

Page 60

1 (Laughter.)
2 MEMBER SUGIMURA: I also -3 MR. TAYLOR: That's why I won't run for
4 office.
5 MEMBER SUGIMURA: Yeah. So I also remembered,
6 during the last election, that part of the excitement
7 was that this Administration would provide water meters,
8 because I live Upcountry, so -- for, you know, that long

was that this Administration would provide water meter because I live Upcountry, so -- for, you know, that long wait list. And then what are you -- take us through -- or take me through the example of what you're -- what you would need to do to make that happen or your challenges that you may have to make that happen and tying it to what --

MR. TAYLOR: Sure.

MEMBER SUGIMURA: -- Susan said about the community plan.

MR. TAYLOR: That's great. I can definitely fit that into -- into this discussion.

MEMBER SUGIMURA: Okay.

MR. TAYLOR: What we're doing, for example, is we have some staff that are going through everybody on the list, looking at exactly where they are, how far they are from lines to connect, how much source is needed, doing cost estimates, et cetera. So there's about 1,500 names. So they're doing an incredible

approval from the representation of ownership about how
 to proceed and how to accurately change our revenue to
 pay for it.

So that's where I was saying that it doesn't really matter who we go to, one group or the other has to approve that. The question to you folks is who do you think is best to make those kind of decisions. So that's how -- and, again, if you think that hasn't been -- if you think that either the Board or Council hasn't done their jobs, then there you go. If you think that's because the Department hasn't done its job, well, then this is more of a management issue, not of -- of an ownership issue.

So I think those are the issues we should really focus on, and not about any, you know, particular guy or any particular project or anything.

CHAIR STONE: Commissioner Hashimoto, you had a question?

MEMBER HASHIMOTO: I think he answered the question. Thank you.

CHAIR STONE: Okay. Commissioners, any further questions? We do have Dave here now. Go ahead, Commissioner.

MEMBER OKAMOTO: Just in listening to this, it almost makes me wonder why you bother to have a board.

Page 63 Page 61 If the Council is doing all the decisions, do you need 1 1 that expertise. They're, again, membership, they're the 2 to have a board? 2 owners. And so we don't really need advice from the 3 MR. TAYLOR: Well, I -- I don't want to speak 3 owners about how to, you know, fix things and operate 4 for the board, but I can tell you one thing they have 4 things. We need advice from owners about what is 5 discussed, it's in their minutes, my guess is they're 5 equity. So I think that's again back to the equity 6 either going to ask -- they're probably going to ask you 6 question, not management. 7 7 for one of two things, either to make them a strong CHAIR STONE: Commissioners, any further 8 semiautonomous board, or sort of downgrade them to just 8 questions? Commissioner DeRego. 9 9 MEMBER DEREGO: Can I just ask a factual an appeals board, or get rid of them completely and have 10 those appeals go to BVA. I mean, they recognize that an 10 question? Earlier, you said the average rate for a 11 advisory board isn't of a whole lot of use. So they 11 meter is \$6,000? 12 12 either want some real authority with some real MR. TAYLOR: A five-eighths-inch meter is 13 13 responsibility, or they're saying, you know, make it about \$6,080, or something. It's right around \$6,000. clear that we are an appeals board. That's probably --14 MEMBER DEREGO: Is that the actual cost? 14 15 I don't know which direction they're going to go in, 15 MR. TAYLOR: No, that's not the cost of the 16 16 they may give a couple options, but it's very clear from meter. The meter costs --17 their discussions that they're not even very satisfied 17 MEMBER DEREGO: I mean -- no. I mean, does 18 being an advisory board without really a whole lot of 18 \$6,000 really cover the cost for the meter? 19 19 MR. TAYLOR: Well, the question is what costs much to do. 20 20 CHAIR STONE: Commissioner Sugimura. are necessary --21 MEMBER SUGIMURA: So tied to what you just 21 MEMBER DEREGO: Necessary. 22 said, then, if -- let's say we got rid of the Board of 22 MR. TAYLOR: -- to cover future water 23 development? 23 Water Supply and they did not have to take care of 24 MEMBER DEREGO: Right. 24 appeals, and leave it to the BVA, I think that would 25 slow the process down for people, just because the BVA 25 MR. TAYLOR: That depends on how much we Page 64 Page 62 develop, where and -- and when. So it really depends on 1 is pretty busy just in itself. So they're serving, 1 2 right now, that function, correct, and --2 what we do. But probably not, to answer your question. 3 MR. TAYLOR: That's correct. 3 I mean, \$6,000 is probably not going to cut it, which is 4 one of the reasons there probably hasn't been a lot of 4 MEMBER SUGIMURA: -- some value in terms of 5 5 source development. Because if you're basing that on the --6 6 MR. TAYLOR: Absolute value. \$6,000 a meter coming in, and you have to make your MEMBER SUGIMURA: -- the absolute value in 7 7 numbers work, well, then, you can't afford to develop 8 terms of for the people? 8 something that costs \$2 million and you can only give 9 9 away 300 meters. You know, of course, you're not doing MR. TAYLOR: And I would recommend -- you 10 know, if it's decided that -- that you want to make a --10 that, if that's the expectation. 11 11 that you're not going to submit a change to have a And it's these questions that either the Board strong semiautonomous board, then, if that happens, I 12 12 or the Council really needs to own. And, again, that's 13 would recommend, to couple with that, then downgrade the 13 what I will ask, is whoever you think is the best to 14 take that on, whether it's a semiautonomous strong board 14 Board of Water Supply from advisory to a water appeals 15 15 or the Council, you know, I would just think that would board. I mean, I think if -- if you're not going to put 16 one on the -- on the ballot, then do the other. 16 guide yours and -- and the Board of Water Supply's

Commissioner CHAIR STONE: Commissioner Crivello. 8 8 MEMBER CRIVELLO: Thank you. Thank you again. DeLeon. 9 MEMBER DELEON: Yeah. I want to echo 9 This may just be a side line, but how much of a relationship, as far as with Planning, you have -- does 10 10 Commissioner Baxa's statement. This is probably the 11 the Board of Water Supply, including the board, with 11 most articulate water director we've ever had in this 12 Department of Public Works, who approves, I guess, the 12 County. And he's taken a very complicated problem and 13 boiled it down to -- to the simple facts that even I can 13 subdivisions or what-have-you? 14 MR. TAYLOR: The County's a pretty small 14 understand them. And what I'm hearing from him is it's 15 not broken. We don't really need to run around trying 15 place. And most of us, especially like me who's been an 16 16 to fix something that isn't broken right now. And if engineer -- I used to be an engineer with Public Works, 17 then Environmental Management, I'm here. A lot of 17 it's not broken, in part, because Dave is in this 18 people have moved around. We all tend to be in the same 18 position and he's able to lead us into the future. I 19 19 appreciate it, Dave. buildings and we still have lunch together. For all the 20 20 MR. I'm not saying it's 21 think there's actually a lot of coordination and 22 22 not broken. discussion because there's not a whole lot of people 23 involved. And we've all known each other for, you know, 23 (Laughter.) 24 a couple decades. So I think some people aren't happy 24 MR. TAYLOR: I'm not saying it is. I don't 25 25 think you should really say that. MEMBER DEREGO: I think --16 You mentioned earlier that there's a possibility when 16 17 there is a strong independent board of a lack of 17 MR. Are you aware of how Honolulu handles that 20 MEMBER DEREGO: I still think they are, 21 21 without a coordination problem? actually. 22 MR. TAYLOR: You know, I'm not. I haven't 22 CHAIR STONE: The Chair, actually, has a 23 23 question. So, first of all, thank you so much for gotten a chance to talk to those guys since I got back 24 from the conference. But that's -- that's a question I 24 coming down. We really appreciate your time. MEMBER DEREGO: Yeah. 25 have for them, is exactly how do they do that. And --25

Page 73 Page 75 1 agenda inaccurately reflects Mark Research. It's 1 first reaction I had to it is that the methodology and 2 2 background section being like three sentences seemed a actually QMark Research. 3 CHAIR STONE: Oh, thank you. Noted. Thank 3 bit thin to me. And, you know, no explanation of why you very much. 4 4 that particular number, where they -- why didn't they 5 5 MEMBER OKAMOTO: Chair? over-sample Molokai and Lanai, which is common practice 6 CHAIR STONE: Yes. 6 for smaller places. Yeah. Methodologically, you know, 7 7 it would be nice not just to have Lance, but the people MEMBER OKAMOTO: May we comment? 8 CHAIR STONE: Yes, of course. Please comment who actually ran the survey explaining exactly what they 9 9 MEMBER OKAMOTO: I also wanted to see this did and why they did it, so -- instead of third-party. 10 10 CHAIR STONE: We'll organize that. We'll because I wanted to see the actual question asked. I 11 think everybody agrees surveys can get any answer you 11 figure that out. 12 12 Also, as I recall, Mr. Collins mentioned that want to get. And this was very obvious the answer that 13 13 was wanted. They were asked if you -- there was no -it was -- he felt it was loose, very loose. It was more 14 -- what they had offered to us was a group within --14 did not seem to be any explanation of what it would do, with opinions. And this part of it, as I recall, was 15 simply if you could elect the person in your own 15 16 16 district. There didn't seem to be any other explanation meant to be quite loose in its --17 17 MEMBER DELEON: Mr. Chair, he was speaking to on how that might affect having a representative. So 18 the actual recommendations from the -- from the -- from 18 that with what Lanai has been through in the last year 19 19 with the residency issue, I would see Lanai people the group as being the opinions of four or five 20 saying 100 percent yes because there was not -- it's 20 individuals working and chewing on the thing. The 21 like saying, would you like to pay less taxes. Sure. 21 survey itself was not loose. 22 22 You know, there has to be what's the other side of it. MEMBER DEREGO: Right. 23 23 MEMBER DELEON: The survey itself was a formal So I was very happy to see this because, to me, it 24 24 answered the question that I had, that the question professionally-done scientific survey. 25 CHAIR STONE: Oh, okay. Okay. 25 asked gave the results that they wanted to get. Page 74 Page 76 CHAIR STONE: Okay. Good. Commissioners, any MEMBER DEREGO: Exactly. 1 1 2 further discussion on this? And, recall, this is --2 MEMBER WIGER: Mr. Chair? 3 this is about proposals which we'll review down the 3 CHAIR STONE: Yes, Commissioner Wiger. 4 4 MEMBER WIGER: As one of the people involved road. 5 5 MEMBER DELEON: Chair, I think it would be in that group, from the West Maui Charter Working Group, 6 6 appropriate to have Lance Collins come and explain the I really want to endorse the commentary about the fact 7 7 full survey and answer questions of like what were that what was offered in terms of opinions came from our 8 exactly the questions, so we can understand the validity 8 group which was comprised of people with a very diverse 9 9 a little bit better. He is not currently available to set of opinions in terms of the whole process. I think 10 10 it's safe to say that there were people all the way -us, so --11 CHAIR STONE: That's correct. So we will try 11 in this group, there were people all the way from an 12 12 to get Lance Collins here to another meeting and we can extremely conservative orientation to a very liberal 13 discuss that. 13 orientation, if one were to put political terminology around it, and a variety of opinions as to how to 14 14 MEMBER DELEON: I think I made a request to 15 15 that effect. And I think rather than pass judgment approach getting to an end point. But the methodology 16 and the survey was not put together by the people who 16 based on this one sheet, I think --17 CHAIR STONE: I think, yes, he was attempting 17 were on that Charter Working Group. 18 MEMBER DEREGO: Yeah. - 1 Beach Charter Working Group. But it also -- it also was
- 2 a response to the people on the Charter Working Group.
- 3 Because we were asked the question, what are the issues,
- 4 what are the issues that you feel are of particular
- 5 interest for West Maui, what are the issues that you
- 6 feel are of particular interest for West Maui. And
- 7 that's an issue -- I can say it very candidly, that's an
- 8 issue in West Maui that rises to the top of a lot of 9

people's list.

10 MEMBER OKAMOTO: Okay. Now, you mentioned the

11 North -- is there a separate Charter Working Group, a 12 North Beach Charter Working Group? I thought you said a

13 North Beach one --

MEMBER WIGER: They were the ones --

15 MEMBER OKAMOTO: - and West Maui.

MEMBER WIGER: No. No. The North Beach one

was the one that I think Dave was referring to in the

18 settlement.

20 MEMBER WIGER: And they were the ones who had

-- who had this money.

22 MEMBER OKAMOTO: Okay.

23 MEMBER WIGER: And could --

24 MEMBER OKAMOTO: I think I have it now.

MEMBER WIGER: The West Maui -- the West Maui 25

MEMBER WIGER: No. There would -- there would not be. Because we were called together, we had -- we had our meetings. And the majority -- I think that Lance probably could give you the people who were at the -- the four of us, when we would meet, the days that we would meet and who was there. Because most times, all of us were there. There were only a couple of times that people weren't. Other than that, that we did not hold public hearings, for example. People went out, talked with folks, had conversations with them, things of that nature. And I don't -- and I don't think that we were -- I don't think that any of us were under the impression that this was something of going out and having public hearings or anything like that. CHAIR STONE: Commissioner Baxa.

15

MEMBER BAXA: Yeah, Mr. Chair. I remember very well when Mr. Collins appeared before us. I think one of the concerns that we had was that he did present findings or recommendations by a group of four people. The key question that we had was whether these four groups of people represented some specific sections of the community, that they spoke for a specific -- several units or groups of people within the community. I still

do not get whether in fact that is the truth or this was

just a group of people who tried to crystalize what they

Page 84

- Charter Working Group was called together under the 1
- 2 aegis of that. And we were asked what -- one of the
- questions that was posed was, what are some of the 3
- 4 issues that you feel are of relative importance to
- 5 people in West Maui. And, very quickly, that issue came
- 6 to the top, as I will tell you candidly. When you talk
- 7 to a lot of people in West Maui that are interested in a
- 8 lot of issues, district voting comes out of a lot of

9 people's mouths. And it just has for a long time.

CHAIR STONE: So, again, these proposals, obviously, will go on the list of proposals to be

discussed further. All right? Commissioner.

MEMBER SUGIMURA: I just have a general question on this report, because Lance gave us all a

15 copy of the report at the June 13th public meeting. And 16 I'm just wondering if there's documentation of sign-in

17 sheets, when you had meetings, or how many public

18 meetings did you have and --

CHAIR STONE: Scope.

20 MEMBER SUGIMURA: -- sort of -- sort of like

21 data to support this. That it was not only, you know,

22 just the four of you.

MEMBER WIGER: Uh-huh.

24 MEMBER SUGIMURA: And, you know, how many 25

actual people did you touch.

thought was what the community wanted.

CHAIR STONE: Well, that's not a direct question, but, Commissioner Wiger, would you like to

3 4 take that? 5 MEMBER WIGER: Yeah. I think that -- again, I 6 don't believe that any of us were under the impression

that our task was to, in fact, conduct large community

8 hearings or anything like that, that we were called 9 together as a group of people from West Maui -- and it

10 certainly wasn't the island, by any stretch of the

11 imagination, it was from West Maui -- and within that --12 within that construct, they tried to balance the four

13 people, as I say, from people that would be considered

14 to be along various points of the political spectrum. 15 And it was really crystalizing then, bringing together

16 these folks, saying, okay, in your opinion, coming from 17

different orientations, what do you think are the big 18 issues facing West Maui. And it quickly came to one

19 real focused question. And then we were -- we were all

20 encouraged to go out, talk to colleagues that we knew, 21 talk to people that we knew, have conversations. We did

that, we would come back together, would communicate again.

CHAIR STONE: Commissioner DeLeon. 24 25

MEMBER DELEON: Try to bring this into focus

- 1 not positive, and I'd like to clarify this with Lance,
- 2 but he is the attorney today on that case. Because
- 3 these people have to come back every year and report to
- 4 the commission as to what they've done with the money.
- 5 And, you know, while that shouldn't give a negative
- 6 effect on what happened here, I think it's important to
- 7 understand, because it's -- if it's a public meeting and
- 8 it was slated for that, that I can understand, but it
- 9 seemed very private and you guys were kind of on your
- 10 own, trying to put this together. And not saying what
- 11 you came up with is not good, I haven't even read it,
- 12 but I'm concerned that an attorney put this together
- 13 from funds, it was never slated as a public meeting.
- 14 So, I mean, I just have some questions. And I -- and
- 15 if -- I think it's the case that I'm -- on the North
- 16 Beach, and I was part of that on a volunteer basis as a
- 17 Commissioner. For me, I need to know that. So I do

18 want to hear from Lance. 19

MEMBER WIGER: And I -- I'm just saying that from the standpoint of the people who sat on the Charter Working Group, I think that we did what we were asked to do and did it objectively and -- and honestly and --

MEMBER MOIKEHA: And I don't want -- I don't want what I just said to -- to give that impression,

24 25 that I'm challenging you on any point in that way. I'm is possible. If they have that capability, that might be better for everyone concerned in terms of instead of having to bring somebody over. That might be another possibility. I don't know what our capabilities here are for that, but it might be something worth looking

into as a suggestion. CHAIR STONE: Very good. Suggestion noted. We can look into it. Yeah?

9 MEMBER OKAMOTO: Just one further. And I --10 you know, I hope Flo is not, you know, taking --

11 MEMBER WIGER: I'm --

> MEMBER OKAMOTO: Because I brought it up MEMBER WIGER: I'm getting very concerned about this.

MEMBER OKAMOTO: And I certainly didn't -- you know, nothing against the group or anything, but I think we just have so many questions. And especially, I -- I have more now that we started talking about it, that the group was -- and not necessarily your group, there may have been other groups that we don't know that North Beach may have asked other things. But to ask a Lahaina West Maui organization what are your strongest concerns, I would be awfully surprised that Charter amendments would be their strongest concerns. I mean, I would think there would be traffic and, you know, lots of

Page 90

1 concerned that Lance is the key person here and you did everything through him, and he was representing. 2

possibly, a client -- today, I know he is -- and if this

4 is the same case and, you know --

CHAIR STONE: Why don't we --

MEMBER MOIKEHA: I have some strong feelings.

CHAIR STONE: Good point, Commissioner. We'll get some clarification on it, make everybody feel comfortable. We'll get it -- we can put some written

10 questions to Lance as well directly. 11 MEMBER DEREGO: Because there's one more point

I want to make about this from the public hearing. I'm going to go back and look again at the record from the last public hearing, but I got the impression that this Charter Working Group reached out to Lance to have him be their consultant. And now I'm hearing that it's

17 Lance that reached out to these particular individuals.

18 So I'm a little bit confused about process here at this

19 point because there are almost two diametrically opposed 20

kinds of explanations about how this actually came about. Now, I'm not ascribing motivation or intention

21 22 on any of this; it's just an issue for clarification.

23 On another point, which is not even resolved to this in terms of saving money, we might consider, if 25 it's possible with QMark, to see if video conferencing

other kinds of things. So we don't know if maybe there were other groups working on those kinds of things. I don't know.

MEMBER WIGER: Well -- and, yeah, I guess I have to say in response that, I mean, we -- we were looking at the Charter. I mean, that's where -- that's where I first got involved. Because we went back and -and looked at the Charter as it had been going on for a long time, we have copies of the Charter, and -- and talked about a whole number of things. So it wasn't that at the first meeting district voting was the only thing we talked about. We talked about a number of issues. What we -- what we came out with and made recommendations regarding was district voting.

And I'm not -- I'm not sure where -- I'm not sure how an impression was given that we reached out to Lance because our committee was formed by being called together. So it wasn't a matter of -- we wouldn't -- we wouldn't have known to reach out to anybody.

CHAIR STONE: Commissioner Hashimoto, you had a --

MEMBER HASHIMOTO: Yeah. I think, Chair, we're spending a lot of time on this.

24 CHAIR STONE: Yeah.

MEMBER HASHIMOTO: And there is no reason for

CHAIR STONE: I agree with you.

MEMBER HASHIMOTO: If we were voting on -- on district voting or whatever we'd be voting on today, perhaps so, but we're not doing that. This has begun to sound like we're sitting on the Ethics Committee more than we are --

CHAIR STONE: Yeah. You know, let's put this -- let's put this in context here. We have proposals put forward from a group. Anybody in Maui County can put proposals forward, no matter what group they are. So let's not worry right now about that. We will -- why don't we review those proposals down the road and give them the merit of the proposal? And I don't think we have to be too concerned about where the proposal started and where it came from because special interest groups will, most likely, give us proposals, if that's what we're assuming could be happening here. Okay?

So, yes, I'll look into discussion, just so, when we do review the proposals, we understand where they originated. Okay? But let's move forward because -- okay.

And so moving on to our next order of business. Our discussion regarding HB593, CD1, 2011 Hawaii State Legislature, and proposed bill before Maui

ordinance or original change, as it was suggested, it would be an ordinance, I guess, was that there be some sanction attached to the filing. If it wasn't filed concurrently, then you didn't end up on the ballot. And that somehow got taken off because it was in conflict with state law at this point.

MEMBER DELEON: I think it would be better that Corporation Counsel deal with it.

CHAIR STONE: Let's let Corporation Counsel take that.

MR. KUSHI: Yeah. The short answer is yes. MEMBER OKAMOTO: That was a long question MR. KUSHI: The proposed Charter amendment, which went through in 2009 -- and I'll pass out a copy

15 of that, it's on the second page -- required a person 16 for elective office, County office, to file financial 17 disclosures concurrently with the filing of these 18 papers.

MEMBER DEREGO: Right.

MR. KUSHI: And there's some language saying that unless you don't do it, some -- some penal provisions or provision saying that your nomination is void. Okay. Our office opined that that is -- I mean, you can do -- you can say that, but it's not effective because state law controls who is going to be a

County Council to amend Section 2.56.060 of the Maui County Code, requiring candidates for elective County

office to file financial disclosure statements

4 concurrently with the filing of nomination papers. I

believe this is in reference to a discussion.

Commissioner DeLeon.

MEMBER DELEON: This grew out of the testimony from former Councilmember Medina. He is making a suggestion that we -- that we reform the financial disclosure law in reference to what happened in the previous election. And where we explained to him that there was a Charter amendment, the County Code provision, the bill that's pending in the County Council, is in relationship to that Charter amendment. So it will match up the Code with the Charter. The Charter has changed. It was changed in the last election. And then the House Bill is in reference to a request from Maui County County -- Maui County Council to the State Legislature to amend state law to allow the intent of these changes to take effect.

MEMBER DEREGO: Question.

CHAIR STONE: Thank you. Yes, Commissioner

DeRego.

MEMBER DEREGO: Which came up at the hearing

as well. It was my understanding that the original

1 candidate for all the elections. That being the case,

they just generally proposed the amendment, on Page 2 of

З. that handout I just gave you, shaded in yellow. It

4 says, "A candidate for elective office shall file a

5 financial disclosure statement concurrently with the

6 filing of nomination papers," period. Okay. Then, as 7

Member DeLeon said, we lobbied the State Legislature to 8

change the law, state elections law, which is the -- in

9 your packets, HB Number 593.

MEMBER DEREGO: Yeah.

MR. KUSHI: And on Page 3 of that proposal, Number 8, underlined, says, for candidates seeking elective office -- county office, a sworn certification by self-subscribing oath by the candidate that the candidate has complied with all relevant provisions of

16 the applicable county charter and county ordinances

17 pertaining to elections. So that amended the state law

18 to say, now, you run from County of Kauai, you've got to

19 comply with County of Kauai charter requirements; if you

20 don't, then you're not elected -- you're not a

21 candidate. It gives the counties the authority to say

22 you're not a candidate. So now, instead of becoming a

23 ethical question whether or not he files his financial

24 disclosure, it becomes a --

MEMBER DEREGO: Administrative.

	Page 97		Page 99

8	MR. KUSHI: Right.	8	CHAIR STONE: The ordinance.
9	MEMBER DEREGO: There's no need to do it by	9	MR. KUSHI: The Charter says

13	MR. KUSHI: It's been done by Charter.	13	MEMBER OKAMOTO: Okay.
14	MEMBER OKAMOTO: Then why has it taken this	14	MR. KUSHI: Above that, the state law

16	CHAIR STONE: It didn't align with the State.	16	MEMBER OKAMOTO: Right.

CHAIR STONE: Commissioner DeLeon.

MEMBER DELEON: Yeah. We brought this to the record because it was raised in the -- in the public hearing. What was happening was the 15 days, some people wouldn't file, then so what, you know. And in one particular case, it went to 75 days, it almost went to the election, without a filing. And he was on the ballot. There wasn't anything you were going to do

MEMBER OKAMOTO: Okay.

MEMBER DELEON: So this requires you to file on nomination day. If you have not filed your financial disclosure, then you have not filed complete nomination papers and you're done, you're not on the ballot. And when the governor signs this law -- and there was some debate going on in the governor's office whether he was going to sign this law or not -- that closes the door finally. But that's a state law issue; that's not something we can address here. And I only brought it to your attention because it was something raised in public hearing that was a legitimate point that needed to be cleared.

CHAIR STONE: Thank you, Commissioner DeLeon,

CHAIR STONE: So I believe what we -- what we could do is put a -- you know, one thing is we do have to put all of our items that we're going to discuss on our agenda. So housekeeping items like that could be -let me talk to Ed and Lisa about how we could do something like that. All right?

MEMBER OKAMOTO: Okay. But -- no, we already said we were going to come back and discuss how to get more people out, that kind of thing, right, to the meetings? Wasn't that earlier in the day?

CHAIR STONE: Was that deferred to now? MEMBER OKAMOTO: I don't -- I'm not sure.

13 CHAIR STONE: Judge Baxa.

MEMBER BAXA: Mr. Chair, I see that the subject matter's about proposals by the individual Commissioners. This is just a suggestion. We have not yet appointed the analyst, but what I would like to see and propose is that once the Chair or the body has selected the analyst -- and, hopefully, that analyst will be one who is well grounded in Constitutional law -- if we could hear that analyst to explain, without making any suggestion, but to explain the structure of county government in relation to state and federal government so that we know how to proceed in some way, how to structure the calendar of the proposals that we

Page 102

Page 104

for bringing that forward for us. Okay.

Moving on to the next order of business, proposed Charter amendments by Commissioners. And, again, I believe this is on the agenda to give the Commissioners the ability, if they have formalized a proposal, to put it forward, and not to discuss. Commissioners?

MEMBER OKAMOTO: No. A question. We were talking during the break that maybe we need some time -and I'm thinking out of order here, maybe put it at the end -- to really talk more of a philosophical, not a specific proposal. But we've heard problems that have come up and are those problems really Charter, you know, how -- things like how do we get more people to come out, how do we -- after we've looked at proposals, do we take them back, some of those kinds of things. But I'm thinking at the end, when -- you know, so that we do that at whatever end of time we have.

CHAIR STONE: We, actually, are close to done with our meeting.

MEMBER OKAMOTO: Well, we have Executive Session.

CHAIR STONE: We move on to Executive, and

MEMBER OKAMOTO: That's --

are going to make. I would like to be enlightened a little bit about those. I have some rudimentary knowledge, but mine is very, very simple. It's not what I expect from a Constitutional expert. So I would like to be able to hear that before we make specific proposals.

CHAIR STONE: Very good. That's a good point, valid point. And once we have our analyst, we're really going to use him and get all the information out of him, or her -- excuse me -- whoever they may be, and get that information. Thank you. We'll make sure that we have some understanding on that.

Again, I believe this agenda item is in here just in case a Commissioner had a proposal to put forward during a meeting. So if there -- at this time, if there isn't a proposal put forward from a Commissioner --

MEMBER DEREGO: Point of information, Chair. In the past meetings, you've asked us to send you, I guess, through Lisa, requests for information. And I would like a clarification exactly of what that means. Can I give you an example?

CHAIR STONE: Yes, please.

MEMBER DEREGO: I'm putting together a list, that's why. There's a -- for instance, if a proposal,

Page 107 Page 105 1 which has been, you know, come -- has been at least 1 them the time what -- to do what they need to do. So 2 voted around, and we discussed it earlier by one of the 2 that -- that is the only reason. 3 3 CHAIR STONE: Valid point. And, please, put councilmembers, an interest of mine as well, about a 4 county auditor, would it be appropriate to send you, 4 the request forward. 5 5 through Lisa, a request that the Finance Department And, again, also -- down on our agenda as 6 begin making cost estimates of what it would cost to 6 well, under announcements, Point A, we will be 7 7 develop a new department that would include equipment, discussing meeting agenda items for the next meeting, 8 8 salaries, benefits, staff, personnel? Because if we're 9 9 MEMBER OKAMOTO: Excuse me. Mr. Chair? going to create a new department, it's going to cost 10 10 CHAIR STONE: Yeah. some money. And, you know, would those be the kinds of 11 MEMBER OKAMOTO: This is, I guess, kind of an 11 requests that you're asking at this point that would be 12 Old Business, but had to do with Cost of Government 12 appropriate that you would pass on to other departments 13 13 Report. Have we -for input? 14 14 CHAIR STONE: Huh-oh, Commissioner DeRego has CHAIR STONE: First of all, requests are good. 15 Requests can come in and, again, on an individual basis, 15 been called out 16 16 the request, whatever makes sense at the time. For (Laughter.) 17 CHAIR STONE: We had a last-minute email from 17 example, we haven't delved into the proposals yet that 18 18 would take us there, but it's something that is Commissioner DeRego apologizing. 19 19 MEMBER DEREGO: Well, actually, I wasn't on potentially coming up and something we need to start 20 understanding, then --20 the agenda, so I was off the hook. 21 MEMBER DEREGO: Right. 21 CHAIR STONE: He has been extremely busy and 22 22 he was -- he was relieved to see he wasn't on the CHAIR STONE: -- yes, the request makes sense. 23 23 And we would see what we could do. I think at this agenda. 24 MEMBER DEREGO: I will make a promise to put 24 time, really, again, it's informational. Like today, we 25 had a very good informational speech from Dave Taylor, 25 one together. Page 108 Page 106 1 1 and that was good for us to have. I want to continue CHAIR STONE: But he will be coming on the 2 forward with that so we all have -- we're smarter people agenda. Was it after July 13th, you said? 3 3 by the time we look at the proposals. So send the MEMBER DEREGO: July 13th, yeah. 4 requests and we'll discuss them on an individual basis. 4 CHAIR STONE: So do we -- we have a meeting 5 5 And if things are -- if it's -- doesn't make sense, then that day, yeah? 6 possibly the request will be put aside until we get to 6 MEMBER DEREGO: The 11th, I think, we have a 7 7 the proposal stage. But we'll look at it as they come meeting. 8 8 in. All right? CHAIR STONE: So after July 13th. Okay. We 9 MEMBER DEREGO: All right. I guess my concern 9 will get him on that. 10 10 MEMBER OKAMOTO: Thank you. is that, you know, since we're doing this sort of 11 11 gathering everything at a certain point and then CHAIR STONE: Okay. Commissioner DeLeon. 12 12 MEMBER DEREGO: I knew you weren't going to beginning discussing them, is the time factor involved 13 for the departments to be able to get the work done that 13 forget. 14 would be necessary to gather that kind of information 14 (Laughter.) 15 15 over and above their regular duties? We wouldn't want MEMBER DELEON: Yeah. Taking it from the 16 to tax the Finance Department because a lot of my 16 opposite perspective -- well, for one thing, we did get 17 requests are going to be the financial implications of 17 a -- we did get an estimate of what the audit would cost 18 these particular proposals. Whenever you make a 18 from -- from Cost of Government Commissioner -- former 19 19 transition or a change in structure, there's usually Cost of Government Commissioner Findley. He put in like 20 20 some financial impact involved. And it would be good 325,000 or something like that. He actually had a 21 21 information, I think, for the Commission to have. But dollar amount, so we might want to go back to him to see 22 the only way to do that is to do some maybe 22 where that came from before we bother --23 23 prognostication, if you want to put it that way, of the MEMBER DEREGO: Yeah. 24 24 kinds of things that we might be discussing early enough MEMBER DELEON: -- anybody else. 25 to be able to give it to the Finance Department to give 25 MEMBER DEREGO: It was about three years ago,

so I would imagine --

MEMBER DELEON: Well, okay. So put 10 percent on it. But I wouldn't want to get our ideas hung up on that kind of complication. I think the ideas got to come first. And if it's obvious, like if you were to change the Water Department back to -- back to -- from Council to Board of Water Supply, you're going to have to rewrite the rules again, you have to go around that whole circle. So there's significant cost with that.

But this is about democracy; it's not about the cost of democracy. And I think we need to focus on the structure and what works best. And -- and if -- and if the dollar amounts are extreme, then the voters will say, no, I don't think it's worth it.

MEMBER DEREGO: But I think that's part of the information that's involved.

CHAIR STONE: I think -- okay. Commissioner DeLeon, thank you. Yes, Commissioner Moikeha.

MEMBER MOIKEHA: I would agree with Commissioner DeRego's comments because, for me, it is going to be a lot of cost. It's not just about structure. And maybe one of the things that helps me to come to terms of whether or not this is something that should be on — out there for the voters may include cost. So I don't see anything wrong with getting some

CHAIR STONE: Yes.

MEMBER DELEON: You want them to come as unit or you want them to come as like one -- one fail swoop?

CHAIR STONE: Commissioner DeLeon, when I scanned through, I did not notice that this point was on the agenda. And to tell you the truth, I would prefer proposals to come in written from the Commissioners to be discussed. So Chair will reword this and find the proper intent behind it for the next meeting. How's that? But I do think that the best way that proposals should come forward from our Commissioners is via written. And it will go on the list and be discussed down the road, as Commissioner DeLeon did previously with his proposals.

MEMBER DELEON: And at what point will we discuss them?

CHAIR STONE: Again, after -- once we get through our public outreach period, as we agreed, we will then move forward and dive into the --

will then move forward and dive into the
MEMBER DELEON: Thank you.
CHAIR STONE: -- proposals.

22 MEMBER OKAMOTO: After --

CHAIR STONE: Sorry. Sorry. One second,

24 Commissioner.

MEMBER OKAMOTO: I'm sorry.

4 be. Just give me a ballpark figure. I don't need a

5 Exel spreadsheet.

CHAIR STONE: I understand.

MEMBER MOIKEHA: I don't know. Maybe --CHAIR STONE: I think what Commissioner DeLeon

is saying as well is that to be looking into cost before we even agree that a proposal is valid is what he is saying. Maybe initially it wastes time, but prognosticating, as Commissioner DeRego said, obvious proposals that are going to come forward that are -- I think we should be looking into those costs, just to have the information, if we can get resources to work on it. So send in the requests. All right. And other informational requests as well, please.

Okay. Commissioners, anything -- we haven't discussed Charter amendments, but anything else you guys want to discuss?

MEMBER DELEON: Go back to this process. So what we have is an item on the table suggesting that Commissioners will make proposals. I have a list. Frank's got a list. I don't know if anybody else has got a list. But how do you want them to come?

Page 112

CHAIR STONE: Mr. Molina.

MR. MOLINA: Mr. Chair, my apologies to Commissioner Okamoto. Just on the subject of submitting Charter amendments, the Mayor's considering submitting a proposed amendment or two, so I could relay back to the Mayor an accurate date of when you would like to receive those amendments from the Administration.

CHAIR STONE: The end date for our public outreach -- when is our last meeting, Lisa? It doesn't mean that is the end date of accepting proposals, by the way.

MS. KAHUHU: July 25th is our last public -CHAIR STONE: Of our first round of outreach.

So once we start diving into the proposals, it's going to get pretty intense. So I would pass on to the Mayor that the beginning of August would be getting on to time to get us those proposals; otherwise, we might already have opposing proposals on the table. So, again, the proposals can come in, you know, we're going to accept proposals, and that's our job. So -- and it's -- we'll figure out how we're going to work with late incoming proposals. But from the Mayor's Office, I think that he has enough intelligence and smart resources to get it in on time.

MR. MOLINA: We'll make sure to try and get

of meetings, we're not giving them anything to say here's some things that are coming up. And it dawned on me, well, in February, we're giving them what we're proposing. We don't have anything in between to say, okay, these 10 items have come up, how important are they to you. And how do we -- how do we work with that? Because I think maybe that's why we're not having so many people attend, there's nothing -- unless they have a real strong feeling about something, there's nothing for them to grab hold of. CHAIR STONE: I agree.

MEMBER OKAMOTO: But when -- when we start to get -- okay, we've got these 20 items or 10 items or five, I hate to wait until February and say, "Here are our proposals." And they're going to say, "Well, why didn't you come back and talk with us."

24 CHAIR STONE: And in fact, I've had this --2.5 I've been on the hot seat about this for the last three

way to do it. So if we publicize those proposals well, we're going to get good response before we have to make our decisions.

And I understand your concern. And other people have your concern, as well as I.

6 MEMBER OKAMOTO: Are we tied into only two 7 public meetings?

13 CHAIR STONE: I'm sorry. Commissioner Moikeha 14 had her hand up.

> MEMBER MOIKEHA: No. I agree with that, your list and getting it out there. But the agenda is also going to tell you what we're talking about.

CHAIR STONE: Yes.

MEMBER MOIKEHA: And so, I mean, they should have that information when it's publicized, but -- to know ahead of time. And that's why August 1st is too late for me to get something from the Mayor. I want to know what it is today. And I don't know why we're giving anybody a deadline. Just send it in. Because you need time to read it, you need time to digest it.

5 out in -- if it can be done through other media avenues,

6 we get those -- the list of proposals that have -- are

7 coming in. But, remember, we need our analyst and our

8 secretary to get that list done. And, also, it has to 9

be -- it has to be labeled properly so people understand 10 what the proposal is even pertaining to. So one of our

11 jobs is going to be getting it out there to the public.

12 Because I can tell you, the second round of public 13

meetings is going to look a whole lot different than the first round. But we do want their input because those

14 15 are already proposals that we are putting forward as a 16 group by that stage. So I think -- I think we do -- we

have to do our job to get out what has already been proposed and get people interested.

Now, don't forget, all of our meetings are public. The public has -- I understand, for Lanai and

21 Molokai, it's, obviously, very difficult, but -- but, 22 you know, people, they can write in, they can email in,

23 they can show up for oral. I just think we have to do 24 the best job we can do. And this is the structure and

format that we're going to work down because this is the

If there's future information or resources you need, you

2 won't be able to schedule that. That's why I'm not

3 opposed to Commissioner DeRego's comments to start 4 looking at costs. Because those -- and each of us will

5 be different in what we weight in our decision to

support or not support something that's going to be out there for the voters to vote on.

So in my mind, get it as soon as you have it, let's individually start doing our own little homework on it, and then make requests for resources if we need that. So when it does come to the day that we are scheduling these discussions, we'll be a little ahead of the game instead of waiting, "oh, well, I need more information."

CHAIR STONE: Good point. Very good point. Commissioner Baxa.

MEMBER BAXA: Yeah. Mr. Chair, I do not know if it is (inaudible), but it was really disappointing to go to meetings, public meetings, where there are only two or three people up there. I do not mean to say that they should not be there, but -- and we should be thankful that some people are almost there every time. But it's really disappointing we do not see more faces from the community. I wonder if -- I know that, in this community, there are several well-known organizations.

And there are lists of organizations that I know. And there should be other organizations that you know as well. If the Chair could perhaps write a letter to the head or presidents of these different organizations and invite them to come and attend any place, at any public meeting, even here, so that at least -- I know -- I know that we publicize in "The Maui News" or even online, whatever, but, to me, the direct communication from this body to those bodies, the representatives, I think it has more effect.

CHAIR STONE: It's a very valid point. And I think what I would like to see is, Commissioners, send me a list of the groups they believe would have some good input for our Commission. We will get them all the information they need. They can get on our mailing list. We can get them on the emailing list. We can get them all the information we need.

I know, again, today, I really — I really was on the hot seat with a group that was wondering why they didn't know what was going on. And they — they said they needed time to know what the Charter was before they were able to bring any ideas forward.

So, again, we're doing the best job we can.

Okay. And we have a tight timeline, which is what I told them, and we want as much public input as we can.

MEMBER CRIVELLO: I would just like to ditto Commissioner Moikeha's thoughts. I don't think we should have deadlines because the sooner we have the information, we can do more of our homework.

CHAIR STONE: Okay. Thank you very much.

MEMBER HASHIMOTO: Chair?

CHAIR STONE: Commissioner Hashimoto.

MEMBER HASHIMOTO: I would like to add to --

to what Commissioner just said and Commissioner Moikeha just said. You know, I think — I think it's — you know, one of the things we don't have much of is time.

CHAIR STONE: Uh-huh.

MEMBER HASHIMOTO: And every time that we walk away from this room early or any room that we meet in, every time we walk away from there, whatever time was left for us that was scheduled for us to meet we've lost, we're never going to get it back. So my recommendation to you is, is that we should take that time to discuss anything that we heard that day or the day before that, or the meeting before that, and come to some kind of thought process that tells us what -- what we learned today and what was hot today, what of all the things that were provided by the testifiers was hot, that we considered to be right on the top of the -- the hot list.

Page 118

Page 120

```
We're not going to stop taking public input through this
process. At some point, you know, when we're really
formalizing our proposals, that's done, but at this
point, get me the list of groups that you guys want to
see. I will -- I will put together a formal letter
requesting a request from them, as we did with Council,
as we did with the department heads, and get them out as
soon as possible. I think that's a great idea.
```

Yes, Commissioner.

MEMBER SUGIMURA: Is this an appropriate time, then, to talk about possibly having someone -- I don't know what the process is right now to get the information out, but -- I don't know if it's Rod Antone, Mike from the Mayor's Office.

CHAIR STONE: You know what, I think let's -- I think that we'll actually put that -- let's put this on the next meeting's agenda and discuss it individually via email. We're going to be running out of -- well, we got another hour-fifteen, but we do have more stuff to take care of. It is a very important discussion, Yuki. We need to discuss it. And, again, all of us, the best thing we can do is give -- give the best input we can and make it happen.

MEMBER CRIVELLO: Chair? CHAIR STONE: Yes.

1 CHAIR STONE: I think that we can discuss 2 items such as what we're discussing.

MEMBER HASHIMOTO: And then we don't have to wait until we have all this big pile of paper in the middle of the room.

CHAIR STONE: What we do need to avoid is that we do need items on the agendas for Sunshine Law. So we got to be a little cautious about discussing proposals, for example, that came in, that kind of stuff. And we aren't going to do that until the end of -- I understand what you're saying. So what I'm going to do on our next agenda is, again, we have -- in announcements, we have next meeting agenda items. There's a lot of stuff we can discuss within there. It's very loose.

MEMBER HASHIMOTO: I just want to make this point, Chair. Again, I've done this before. Okay. I don't want to waste my time to drive from Hana out here for a meeting for one hour.

CHAIR STONE: I respect that.

MEMBER HASHIMOTO: Okay. And if we're going to waste the three hours, then there's no reason for me to show up.

CHAIR STONE: Commissioner Hashimoto, I totally respect that. All I'm saying is, is put it in the right place on the agenda. That's all I'm saying.

We've laid these rules on ourselves. We've agreed that this is a good path to go down. Yes, we will use all of the time and make the most of the meetings. Right. So -yes, Commissioner Okamoto.

MEMBER OKAMOTO: Well, on the Sunshine Law, so

discussing regular meetings, right? Am I correct.

2 MEMBER OKAMOTO: Well, no. I'm just -- I 3 was -- on the public meetings, how much we can clarify, 4 I guess is the word for it. 5

CHAIR STONE: I think we've been doing a pretty good job so far. So let's just continue forward and we'll keep working the way we are. Everything is fine.

Go ahead, Commissioner.

MEMBER DELEON: I'm just hearing from the Commissioners from Molokai, Hana and Lana, who have to spend the whole day to get to these meetings, they're trying to squeeze every element out of it they can. So we ought to be as thorough as we can to try to squeeze that into the agenda, so, as Commissioner Hashimoto said, we don't waste a minute.

CHAIR STONE: Very good. So --MEMBER BAXA: Mr. Chair? CHAIR STONE: Yes, Commissioner Baxa. MEMBER BAXA: I heard what Mr. Hashimoto said. I think it's a very, very good point, Mr. Chair. But I

22 am also aware about the Sunshine Law prohibition here. 23 Perhaps if we can do something like this. And I do not 24 know if it is feasible. There is an agenda where you

have specific topics to be brought in at a certain

Page 122

if we go to a public meeting and John Doe brings up something that maybe we haven't heard before, we're not discussing it so much as a Charter amendment, but is -can we then talk about it at that meeting, because it was brought up at that meeting, or not? I just --CHAIR STONE: Well, for example --MEMBER OKAMOTO: As far as Sunshine Law. CHAIR STONE: To be realistic, when somebody

comes up and gives oral testimony, we discuss it, we ask them questions, we want to know about it. And that's part of our job to find out, clarify.

MEMBER OKAMOTO: Okay.

CHAIR STONE: All right. We're not debating --

MEMBER OKAMOTO: Right, you're clarifying. CHAIR STONE: -- the proposal; we're

clarifying the proposal. Yes.

MEMBER SUGIMURA: Correct me if I'm wrong, Chair, but I thought that, in early discussions, our earlier meetings, we had decided that the public meetings would be to receive information from the public and ask them questions, and that meetings would be conducted here. So I thought that's what we were doing, the public meetings versus our regular meetings.

CHAIR STONE: Yeah. I think they're

Page 124

period. I wonder if there is a portion at the end of the agenda where it is devoted to discussing what had been discussed the day before, or the present day, so that maybe not lose track of the things that had been said, as suggested by Mr. Hashimoto. I'm just trying to, if we can -- I do not know if that is possible. We have to ask the First Deputy Corporation Counsel whether this will comport with the Sunshine Law.

CHAIR STONE: Very good. Before I move to you, Commissioner DeLeon, Corp Counsel, could we have some input on that, please?

MR. KUSHI: Yeah. If it's -- if it's -- the rule of thumb is if it's so general you can be discussing anything, that would be a violation. Okay. The second rule is if you're going to --

CHAIR STONE: Sorry. Could you speak up and repeat that, please?

MR. KUSHI: If an agenda item is labeled to be so general, so general, generic, that a member of the public does not know what you're going to discuss, then I would say it's too vague and stay away from it.

Secondly, any item that you discuss, you got to indicate whether you're going to take action on it or not. That notifies the public that, hey, they better be there if they're against it or for it.

Page 125

Page 127

So those are the two rules of thumb. You could have some general, but, yet, a little bit more identifiable issues, about, you know, comments from Commissioners on public testimony received, stuff like that.

MEMBER DEREGO: Can I ask a question here, clarification as well?

CHAIR STONE: Please, Commissioner. Go ahead.

MEMBER DEREGO: We still have several
housekeeping issues we have not discussed at length.

One of them Dave brought up. And I'm more and more now thinking that we do need a separate website or something to at least get ourselves out there. I am coming to that point, at least, with the -- but I think these are -- that could be a specific kind of issue we

Another issue that we still haven't worked out is calendaring everything we're supposed to do so it all fits in into some -- some kind of time schedule so we get a report done in a reasonable amount of time. That would be an issue, I think -- correct me if I'm wrong -- that we, as a Commission, could do some calendaring at that particular point if we have one of these hearings, you know, that just lasts an hour and-a-half, you know, if we put on the agenda beforehand. And if we don't get

issued agendas for the next four or five public hearings. We did it already. We can always amend the agendas. So if you've got some ideas, work with the Chair, work with our staff, and we can put in on the next public hearings. So not to waste your time, maybe you can at least have another half an hour of discussion.

In terms of maybe calendaring, scheduling, maybe you can handle it right now. I was going to, with the Chair's permission, give you a proposed structure as far as that. And it was your idea to work backwards from April 2012.

CHAIR STONE: Very good. Let's do it.

MR. KUSHI: So, you know, according to the schedule, July 25th of this year, next month, is your last public hearing. So from August 1st until end of November, that's four full months. Okay. If you meet twice a month, that's eight possible hearings, hearings like this, that you have to work on and come up with concrete proposals. Meetings, right. Yeah, meetings. If you want to do it more than twice a month, better yet. So we're looking at the end of November. Then second round of public hearings start December and end in January. That's two full months. You're going to have eight meetings, one meeting per week, at the

Page 126

Page 128

to it, then we don't get to it. But it's -- it would --it would be just in case, you know, okay, that particular specific agenda item that we're going to talk about calendaring and -- and working on what we're going to do and how we're going to work these proposals, or we're going to talk about media or we're going to talk about what information that we feel that we need from particular departments, who we want to show up at our meetings. Oftentimes, we don't -- aren't able to discuss those kinds of issues which are, basically, a lot of times, housekeeping. Hard to do via email, right, but -- but something that would be a part of the agenda. That's just a suggestion I would have.

CHAIR STONE: I have a question for Corporation Counsel. Is it possible to have, within our agenda, a housekeeping agenda item? And that way --

MR. KUSHI: That's a really good idea,
Mr. DeRego, as far as, you know, like calendaring some
separate issues that you could cover at your public
hearings, your community hearings in addition to
receiving testimony, blank unsolicited testimony. But
you have to put it down on the agenda.

MEMBER DEREGO: Exactly. And that would be my suggestion.

MR. KUSHI: What we've done last week is we

various community areas.

MEMBER DELEON: I have a problem with that. It's right in the middle of the holiday season.

MR. KUSHI: Well, I mean, I'm trying to fit it in. Then you look at September -- I mean, then we go into February 1st to, actually, April 9th, 2012. That's two-plus full months. Nine weeks, possibly could have nine meetings to finalize your report, if you choose to meet once every week. So I think, based on that schedule, aside from the problems with holidays, you have more than enough time to complete your task.

MEMBER SUGIMURA: What was August 1 to November?

MR. KUSHI: August 1st to November 30th would be four full months for this Commission to work on proposals. And if you meet twice a month, that's eight meetings.

CHAIR STONE: Again, obviously, if we're not getting to our target, we're going to have to increase our meeting duration.

MR. KUSHI: Right.

CHAIR STONE: Or our meeting schedule.

23 MEMBER BAXA: Mr. Chair?

24 CHAIR STONE: Yes, Commissioner Baxa.

MEMBER BAXA: I don't want to lose focus on

Page 129 Page 131 1 CHAIR STONE: -- one of the items that will 1 the suggestion of Mr. Hashimoto. I want to follow that 2 2 definitely be -up. I think that his suggestion was good. But, again, 3 3 as we mentioned, perhaps the Chair could make specific MEMBER DELEON: Then, that way, you're not topics for the agenda, but then, at the last portion, 4 4 dealing with ad hoc testimony walking in the door. 5 5 there is a portion that is devoted to discussing what CHAIR STONE: Right. 6 6 MEMBER DELEON: Whatever idea somebody walks happened the day before, the day, right there, and maybe 7 7 assign for the next meeting -- that it will now be in in the door. And that way, you know you got it on your 8 8 agenda and it's something that's in the Members' minds the agenda for the next meeting that some 9 9 decision-making may be made, perhaps not final, maybe already, and then it gives it the chance to get digested 10 10 before it goes away. Because, the next meeting, we'll tentative, something that we could go back later on so 11 that we do not lose sight of the important things that 11 be on to something else. 12 12 CHAIR STONE: I think we could potentially happened yesterday and today. I like that idea. 13 MEMBER OKAMOTO: Mr. Chair? 13 discuss -- and let me run this by Corporation Counsel --14 14 CHAIR STONE: Yes. is could we discuss -- for example, let's say we want to 15 MEMBER OKAMOTO: Under Old --15 talk about the last meeting. Can we discuss the agenda 16 16 CHAIR STONE: Commissioner Baxa, thank you. of last meeting towards of the end of our meeting, if 17 MEMBER OKAMOTO: Under Old Business, can you 17 there's any items of discussion people wanted to bring 18 discuss anything that's already been discussed? 18 back up? In other words, we're getting close to the end 19 19 CHAIR STONE: I believe we can put a number of of our meeting. 20 items in Old Business. 20 MR. KUSHI: I don't understand the question. 21 MEMBER OKAMOTO: Oh. But you would have to 21 CHAIR STONE: In other words, the agenda is on 22 22 our agenda -- or, I'm sorry, the minutes. Excuse me. put it in? 23 23 Sorry. The minutes are on our agenda now. We approved MR. KUSHI: You have to list it. 24 CHAIR STONE: You have to list it. 24 the minutes. It doesn't mean that we can't go and 2.5 MEMBER DEREGO: It has to be listed. 25 discuss the minutes later on down the line if we have Page 130 Page 132 1 CHAIR STONE: This is a -- it's a bit of a 1 topics of discussion from that -- the minutes. Is that 2 tricky issue. I understand what -- what you 2 possible? 3 Commissioners want. Let me take care of it. I will 3 What we're trying to do here, Ed, is we're 4 trying to have -- to use our time wisely and use all of 4 make sure that we have enough items to fill our plate, 5 more than enough items, so that when we leave this room, 5 the time since we're all sitting here. So help me out 6 we have some stuff we have to take care of for the next 6 here in trying to come up with ways, at the end of our 7 7 meetings, to have discussion topics without them being meeting. I understand what you guys are getting at. 8 8 too vague or outside of the Sunshine Law. That's what Let me take care of it. And I will make sure that we 9 9 have a lot of very good stuff to discuss. we're trying to avoid. 10 10 MEMBER CRIVELLO: Mr. Chair? Again, today was our first -- well, our second 11 presentation. And I'm trying to get a idea of how long 11 CHAIR STONE: Yes, please. 12 12 these presentations will take and how long we need the MEMBER CRIVELLO: Is this something that you 13 13 can take up with Corp Counsel? Q&A for. So I could -- I could also add a couple of 14 other informational periods. I'm balancing that right 14 CHAIR STONE: Yes, it is. 15 15 MEMBER CRIVELLO: And bring it back -now, but I do understand what the Commissioners face 16 coming here, which is much appreciated. Your time is 16 CHAIR STONE: That's what I'm going to do. 17 17 MEMBER CRIVELLO: -- to the Commissioners so very much appreciated. 18 18 Any other Commissioner on this discussion? we can continue with our --19 19 CHAIR STONE: Yes. Let's continue forward. Commissioner DeLeon. 20 MEMBER DELEON: In reference to items like the 20 Yes. This will be taken care of and we will make sure 21 water director today, it's on the -- on the agenda, 21 that people will be begging me to close the meetings.

So, likewise, if I, as a Commissioner, may not agree with his commentary or viewpoint, I can come in as an individual, also? CHAIR STONE: Yes. I believe that would be MEMBER CRIVELLO: Well, then CHAIR STONE: Actually cause some stir, which is, I think, good. We need, you know, that got to get the temperature rising. Commissioner Moikeha.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MEMBER DELEON: Finish up on that topic. MEMBER OKAMOTO: Okay. MEMBER DELEON: I want to suggest that because I have a particular proposal on the table already that's kind of phrased as sensitivity, I would like to have Kay on that committee. And I've worked with Kay before on other issues. And we're she's very sharp and she would be able to review it. And I think the Chair you know, have a triangle of perspective to make sure that it's going out in a way that everybody is happy with. CHAIR STONE: Okay. Sounds good. MEMBER DELEON: She's a former school teacher. She's good. CHAIR STONE: Commissioner Okamoto.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	CHAIR STONE: You know, what we don't want to do is the community to believe that we took a position. MEMBER DELEON: Yeah. KAHUHU: The pilots are on standby, and they can leave at any time that we're ready to go. CHAIR STONE: Yeah. There we go. That answers that. Any other items of discussion for the next meeting agenda? We have another two or three minutes. MEMBER MOIKEHA: Chair? CHAIR STONE: Yes. MEMBER MOIKEHA: Given the interpretation of what the time limit is for the public testifiers, do we need to revisit our rule on that? I didn't think that that's what it meant, but, apparently, it does. CHAIR STONE: I'm sorry? Oh. MEMBER MOIKEHA: Given the testimony CHAIR STONE: During the break, Ed showed me the rule. It does state that. MEMBER MOIKEHA: That's the rule in our rules that we adopted?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MEMBER MOIKEHA: That was my point.
